LAB SHEET 1

Part A — HTML Structure (Phase 1)

1. Create a project folder named <yourstore>-frontend. Inside it, create the following pages: index.html (Home), products.html (Product Listing), product-detail.html, cart.html, checkout.html.
2. On every page, add a common <header> with your store name/logo and a <nav> containing links to Home, Products, and Cart.
3. On index.html: add a hero/banner section introducing your store, and a 'Featured Products' section with at least 4 placeholder product blocks (image, name, price — plain HTML for now, no real data fetching yet).
4. On products.html: list at least 8 products using repeated HTML blocks (image, name, price, 'Add to Cart' button).
5. On product-detail.html: show one product's full details — larger image, name, description, price, quantity selector, 'Add to Cart' button.
6. On cart.html: create a table or list layout showing item name, quantity, price, subtotal, and a grand total row.
7. On checkout.html: create a <form> with fields for Name, Address, City, Pincode, Phone, and Payment Method (radio buttons), plus a 'Place Order' button.
8. Add a common <footer> with contact info and copyright text on every page.

Solution -> index.html

```
